

<b>BFI 521 Risk management (Theory)</b>	
This course deals with the theory of corporate risk management. Along the risk management process it will be discussed how a corporate risk strategy can be developed, how relevant risks can be identified and measured, how they should be dealt with and monitored in an appropriate way, and finally which legal and governance aspects need to be addressed. Selected case studies will be used in order to demonstrate practical implementation of the theory.	
<b>Assignments: oral exam</b>	
<b>Lecturer: Prof. Dr. Jamin</b>	<b>ECTS: 4</b>
